

Good morning,

I recently learned of the new Low Power FM broadcast service. Although this new service may be helpful to some, I fear it may replace my favorite station I currently listen to which is K-LOVE, on 88.9 FM. K-LOVE fulfills all our listening needs and is a tremendous asset to the community. Everywhere I go in this community I hear of how people love to listen to this station and how it effects their lives. The effect a wholesome radio station such as K-LOVE has on our community is priceless. Without the station, the community would not be the same. It brings so much needed support to so many during these stressful times, I ask you to consider my request NOT TO allow a low power FM station to have priority over K-LOVE.

Thank You
Paul Lerch
